The acronym **VF** stands for *Visual Fan*, a term often used in the context of fan translations of manga and light novels. A **scan VF** is typically a fan translated version that includes visual elements, such as the original artwork, but with the text translated into another language (commonly English).

How Scan VF Works

1. Source Acquisition – Fans obtain scanned images of original manga pages from official releases or authorized sources.
2. Translation – A team of translators converts the Japanese text into the target language.
3. Editing and Formatting – The translated text is placed back into the scanned images, ensuring the flow matches the original layout.
4. Distribution – The completed scan is uploaded to fan sites or shared via file sharing services.
